

Software Developer specializing in Flutter, Full Stack Web Development, and RESTful APIs. Experienced in building scalable, cloud-backed applications using Next.js, Node.js, Firebase, Supabase, and SQL/NoSQL databases. Strong foundation in Data Structures, OOP, DBMS, and Operating Systems, with proven experience in hackathon-driven development, performance optimization, and UI/UX design.

SKILLS

Languages	C / C++, Python, Core Java, Javascript, Dart, HTML, CSS
Frameworks	Flutter, NextJs
Backend Services	Firebase, Supabase, MongoDB, Postgresql, Prisma ORM
Core concepts	Data Structures & Algorithms, OOP, DBMS, Operating Systems, SQL
Tools & Design	Git, GitHub, Figma, Adobe Creative Suite

PROJECTS

1. Real-Time Disaster Management System (Hackathon Winning Project at InnovAltion by Intuitive Ai and DA-IICT)

Tech Stack: Flutter, MERN Stack, DeepLabV3+ & ResNet-101, Redis, Docker and Kubernetes.

- Built a real-time disaster response platform with offline Wi-Fi SOS communication to enable victim-rescuer connectivity without cellular networks.
- Applied AI-based analysis on drone and satellite data to detect high-risk zones and prioritize rescue operations.
- Integrated IoT sensors (ESP32, MQ-135) for early detection of forest fires and gas leakage in critical areas.
- Developed a scalable MERN backend with caching and containerization to handle multiple SOS events and live dashboards.

2. OneFlow – Project Management & Resource Planning Platform (Odoo X Amalthea IIT Gandhinagar Hackathon)

Tech Stack: Next.js, PostgreSQL, Prisma ORM, REST APIs.

- Built a full-stack project management platform enabling task tracking, team collaboration, timesheets, and analytics dashboards.
- Implemented role-based access, task workflows, priority/status management, and real-time data handling for teams.
- Designed scalable backend APIs and optimized database schema for performance and multi-project resource planning.

3. Quick Court – Sports Court Booking Platform | Finalist – Odoo Hackathon 2025

Tech Stack: Next.js, Flutter, PostgreSQL, Prisma ORM, REST APIs.

- Developed a full-stack web platform for booking sports courts (badminton, cricket, pickleball) with date and time scheduling.
- Implemented user authentication, court availability management, booking workflows, and relational database design.
- Built a companion Flutter mobile app providing seamless booking experience with consistent UI and backend integration.

EDUCATION

B. TECH - Computer Engineering	2022 - 2026
G H Patel College of Engineering & Technology	CGPA - 8.82

TECHNICAL EXPERIENCE

Software Developer Intern at eSparkBiz Technologies Pvt Ltd | Jan 2026 – Present

- Contributing to real-world web and mobile application development by implementing scalable features and optimizing application performance.

Flutter Developer Intern, GPHOOD TECH NIGAM PVT LTD | May 2025 – June 2025

- Engineered cross-platform Flutter features using Firebase Authentication and Firestore, improving performance and UI responsiveness.
- Collaborated with the team to design responsive UIs and enhance app performance.

Executive Member, CSI-GCET | Feb 2025 – Present

- Boosted workshop participation by 40% and managed technical events with 500+ attendees through strategic marketing.
